

Non-Contact LCD Digital Thermometer Fever Handheld Infrared Forehead Body Thermometer

Human Body

Surface

Animal

Features

- **Multi-purpose:** can measure human body temperature, skin temperature, surface temperature, liquid temperature, bath water temperature, rice cereal etc..
- **Fast and accurate:** 1 seconds accurate temperature measurement, measurement deviation up to + / - 0.2 Deg.C.
- **Non-contact:** 3 - 5cm measurement distance, without contacting with human skin, healthy and safe, to prevent cross-infection.
- **3 Colors** back light to warn high temperature.

Model No.	IR-988 Clinical Infrared Thermometer
Dimensions	112mm*52mm*182mm
Weight	Approx. 125g(exclude 2 AAA batteries)
Display	LCD
Body Temperature Range	32.0°C-42.9°C
Object Temperature Range	0°C-100°C
Memory	32 Groups
Response Time	<2 Second
Working Environment	Ambient temperature: 16 °C -35 °C; Relative humidity: ≤85%
Transport and Storage Condition	-20°C~55°C
Accuracy	34.0-34.9 °C: ± 0.3 °C; 34.0-42.0 ° C: ± 0.2 ° C ; 42.1-42.9 ° C: ± 0.3 °C
Display Resolution	0.1°C
Voltage Source	2 x 1.5 V; Battery size AAA
Automatic Power Off	≤15 seconds
Packing	1 pc in a colour box
